Dear Parents,

Re: VOMITING BUG AND SORE THROATS

I just wanted to alert you to the fact that there is a vomiting virus going through the school – students, as well as staff, have had time off from school with this bug. Children complain of a stomach ache which leads to vomiting.

We have also had children off sick with high temperatures, headaches and a sore throat.

We have been reminding the students to wash their hands thoroughly.

Yours sincerely,

Helen Bourne
